

*In Memory Of
Jodi Boninfante
April 28, 1968 - March 25, 2017*

Jodi spent 28 of her 48 plus years working for ADL. She began as its first mobile phlebotomist, assuming many duties and positions through her long tenure and was presently one of ADL's top producing Business Development Representatives.

Many of our clients and colleagues know that Jodi always made the patient her primary concern. She possessed a rare talent for expressing understanding and empathy, regardless of the degree of difficulty involved with a patient encounter. In the same vein, Jodi projected a positive attitude and willingness to share her knowledge and encouragement with all of us who had the good fortune to have worked alongside her.

Jodi's long and difficult battle with ovarian cancer came to an end on Saturday morning. Through Jodi's painful and debilitating struggle with this affliction, Jodi still maintained her work schedule between cancer treatments. All of us who knew Jodi understand that it was her physical being and not her will to live that eventually gave way to the cancer.

Jodi was an inspiration and truly did so much for so many of us associated with ADL. The memory of Jodi will live on in the hearts and minds and souls of all of the lives she touched.

We express our deepest sympathy to Jodi's husband Kenny and son James. Services will be held on April 5, 2017 at 11am. Please visit danjolell.com/obituaries for additional information.

Jodi, Rest in Peace! We miss you!
