

K2/SPICE TESTING NOW AVAILABLE

ADL developed our K2/Spice test using Ultra Performance LC/MS/MS. UPLC-MS/MS is the most sensitive method available for the detection of legal and illegal substances. Sample matrices include blood, serum and urine. This test is performed routine and run **STAT** for our Hospital/Emergency Room clients.

K2/Spice is a synthetic cannabinoid that imitates the effects of marijuana. The active substances in K2/Spices are JWH-018 and JWH-073. They are found in more than 27 herbal compounds via the internet and in local stores. The product is marketed under such names as K2, Spice, Genie, Yucatan Fire, Blaze, Red X Dawn, Bliss, Black Mamba, Bombay Blue, Fake Weed, Genie, Zoh, Pot-pourri, Buzz and Skunk. The effects of JWH-018 AND JWH-073 are much more potent than THC and can be smoked or taken orally.
