

## # 593 - cobas® SARS-CoV-2 RT-PCR TEST PERFORMED BY ADL

The cobas® SARS-CoV-2 Test is a molecular assay that allows the detection of nucleic acids in samples from patients who meet CoVID-19 (coronavirus) clinical and/or epidemiological criteria.

\*Emergency Use Authorization

1. **Requisition:** (specimen will not be processed if requisition is not completed)

Demographics

- a. full name
- b. date of birth
- c. complete address
- d. telephone number
- e. date

Questionnaire (provide yes or no – do not leave blank)

- a. temperature (F°)
- b. cough
- c. runny nose
- d. shortness of breath
- e. sore throat
- f. exercise within 24 hours
- g. use of Biotin
- h. gender (M, F, LGBTQIAPK) NY only
- i. ethnicity NY only
- j. race NY only

2. **Specimen requirements:**

- a. Nasopharyngeal, Oropharyngeal, or mid-turbinate swab collected and placed in UVM (universal viral medium) or UTM(universal transport medium)
- b. Alternate medium includes only PCR medium or sterile saline when UVM or UTM are unavailable

3. **Storage/Transportation of Specimen:**

- a. Stable at 2°-8°C for up 48hrs.
- b. Samples collected in UVM or UTM may be frozen if not tested within 48 hrs.

4. **Results:** Target Detected, Target Not Detected, Indeterminate

IF additional testing is indicated: Please call the lab for instructions and supplies

5. **Fee:** \$100.00

Physician script/requisition is required.
