ESRD and Dialysis Patients Law

All Laboratory services furnished to renal dialysis patients for the treatment of End Stage Renal Disease (ESRD) are included in the ESRD Prospective Payment System (PPS) payment. Composite rate laboratory services/tests should not be reported on claims. ESRD facilities should only bill for laboratory tests related to the treatment of ESRD or other laboratory tests performed by the dialysis facility (i.e., CLIA waived lab tests). Lab tests that are not for the treatment of ESRD and are not performed by the ESRD facility are not to be reported on the ESRD facility claim. (CMS Publication 0087 - Laboratory Services for End-Stage Renal Disease Subject to Part B Consolidated Billing: Unbundling 2018-03-14)

WHAT THIS MEANS:

- Based on this updated CMS law: If testing is ordered for ESRD, ADL cannot perform the testing and bill Insurance. The *ordering facility* will be responsible for payment.
- Based on this updated CMS law: If testing is NOT ordered for ESRD, then the *ordering entity* should NOT include an ESRD-specific diagnosis code.

**Please use the appropriate ICD-10 to specify medical necessity of tests ordered.

- The list below includes the lab tests that fall under the bundled ESRD umbrella. ADL follows all CMS laws; therefore, if the diagnosis code provided is an ESRD and these tests are ordered, the *ordering entity* WILL receive an invoice from ADL for these services. No exceptions.

LAB TESTS SUBJECT TO ESRD CONSOLIDATED BILLING

CPT/HCPC	Short Description	CPT/HCPC	Short Description
80047	Basic Metabolic Panel (calcium, ionized)	84157	Assay of Protein by other source
80048	Basic Metabolic Panel (calcium, total)	84295	Assay of Sodium, serum
80051	Electrolyte Panel	84466	Assay of Transferrin
80053	Comprehensive Metabolic Panel	84520	Assay of Urea Nitrogen
80069	Renal Function Panel	84540	Assay of Urine/Urea-N
80076	Hepatic Function Panel	84545	Urea-N clearance test
82040	Assay of serum Albumin	85014	Hematocrit
82108	Assay of Aluminum	85018	Hemoglobin
82306	Vitamin D, 25 hydroxy	85025	Complete (CBC) automated (Hgb, Hct, RBC, WBC, and Platelet count) & automated differential WBC count.
82310	Assay of Calcium	85027	Complete (CBC), automated (Hgb, Hct, RBC, WBC, & Platelet count)
82330	Assay of Calcium, ionized	85041	Automated RBC count
82374	Assay, blood Carbon Dioxide	85044	Manual Reticulocyte count
82379	Assay of Carnitine	85045	Automated Reticulocyte count
82435	Assay of blood Chloride	85046	Reticulocyte/Hgb concentrate
82565	Assay of Creatinine, serum	85048	Automated Leukocyte count
82570	Assay of Urine Creatinine	86704	Hep B core antibody, total
82575	Creatinine clearance test	86705	Hep B core antibody, IGM
82607	Vitamin B-12	86706	Hep B surface antibody
82652	Vitamin D 1, 25-dihydroxy	87040	Blood culture for bacteria
82668	Assay of Erythropoietin	87070	Culture, bacteria other
82728	Assay of Ferritin	87071	Culture, bacteria aerobic other
82746	Folic Acid serum	87073	Culture bacteria anaerobic
83540	Assay of Iron	87075	Culture bacteria, except blood
83550	Iron binding test	87076	Culture anaerobe ident, each
83735	Assay of Magnesium	87077	Culture, aerobic identify
83970	Assay of Parathormone	87081	Culture screen only
84075	Assay of Alkaline Phosphatase	87340	Hep B surface Ag, EIA
84100	Assay of Phosphorus	87341	Hep B surface Ag, EIA
84132	Assay of Potassium serum	G0499	Hep B screen high-risk individual
84134	Assay of Prealbumin	G0306	CBC/diff, WBC w/o platelet
84155	Assay of Protein, serum	G0307	CBC without platelet
